WEB DEVELOPMENT

Activity-Based Learning (ABL) Assignment

CONSOLIDATED PROJECT REPORT

Three Website Case Studies with Output Screenshots

Student Name	Sanka Tagore Krishna Chaitanya
Roll Number	26001113
Branch / Section	CSM-4
Course	Web Development
Institution	Dr. RVR NRI Institute of Technology

Submitted as a consolidated report for the Web Development Activity-Based Learning assignment. The report presents three website case studies and their output screenshots.

1. Introduction

The circular dated 15-10-2026 asks first-year B.Tech students to select any three case studies, design and develop suitable webpages or websites, and submit one consolidated PDF report containing screenshots of the webpages. This document organizes the three supplied website screenshots as three case studies.

2. Case Studies Included

Case Study 1: PrimeArea Online Shopping Website

PrimeArea is an online shopping storefront concept that presents featured products and promotional offers in a simple, card-based layout.

Case Study 2: Digital Library Website

The Digital Library website is designed to help users discover books, check availability and review basic library rules.

Case Study 3: Personal Portfolio Website

The Personal Portfolio website introduces a student profile and organizes education, skills, hobbies, projects, achievements and contact details into separate sections.

3. Technologies

The screenshots show website interfaces. The exact source code and implementation technologies cannot be confirmed from screenshots alone. If these webpages were built for this assignment using HTML, CSS and JavaScript, list those technologies in the project README and explain their roles during demonstration.

4. Submission Checklist

- Include the source code for all three case studies in the GitHub repository named WD-Activity-Based-Learning.
- Add a README.md containing student name, roll number, branch, section and the three case-study titles.
- Upload this consolidated PDF with screenshots to the repository.
- Be prepared to explain and demonstrate each website independently.

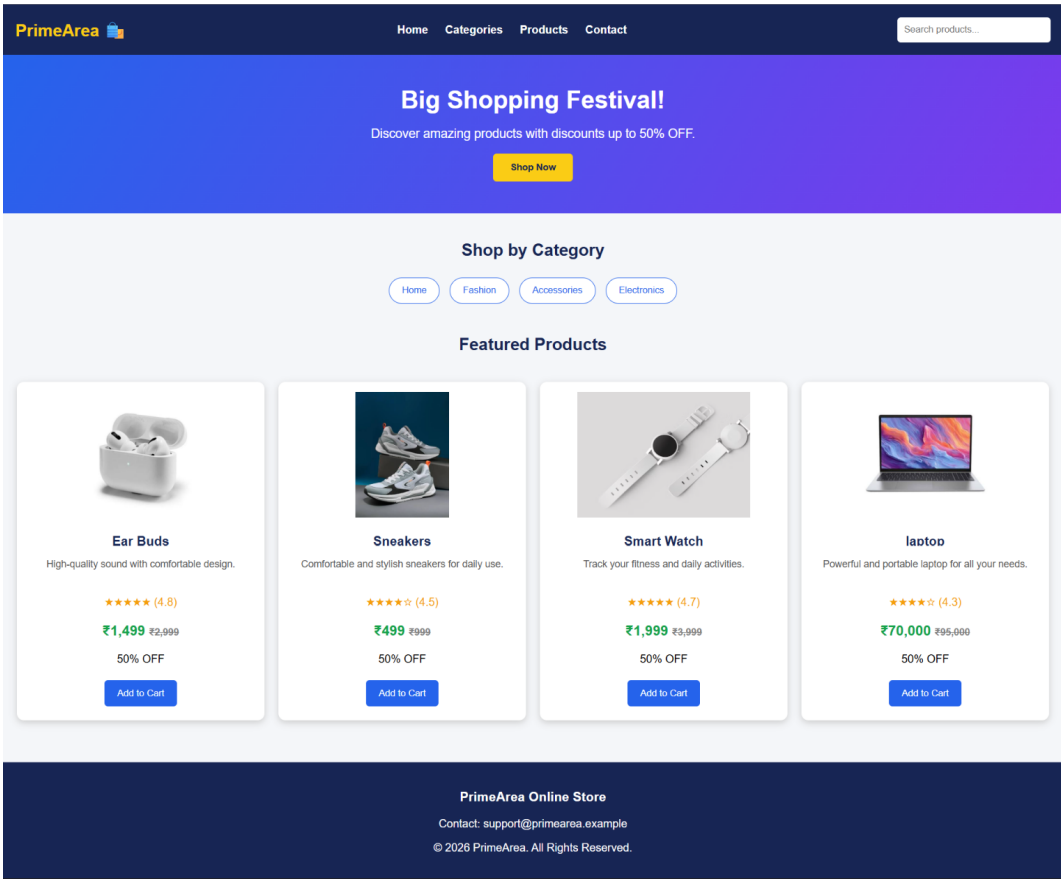

Case Study 1: PrimeArea Online Shopping Website

Overview

PrimeArea is an online shopping storefront concept that presents featured products and promotional offers in a simple, card-based layout.

Visible Features

- Navigation links for Home, Categories, Products and Contact.
- Search field for finding products.
- Shopping-festival banner with a Shop Now call-to-action.
- Category filters for Home, Fashion, Accessories and Electronics.
- Product cards showing product images, descriptions, ratings, prices, discounts and Add to Cart buttons.
- Footer with store name, contact email and copyright information.

Output screenshot: PrimeArea online shopping homepage.

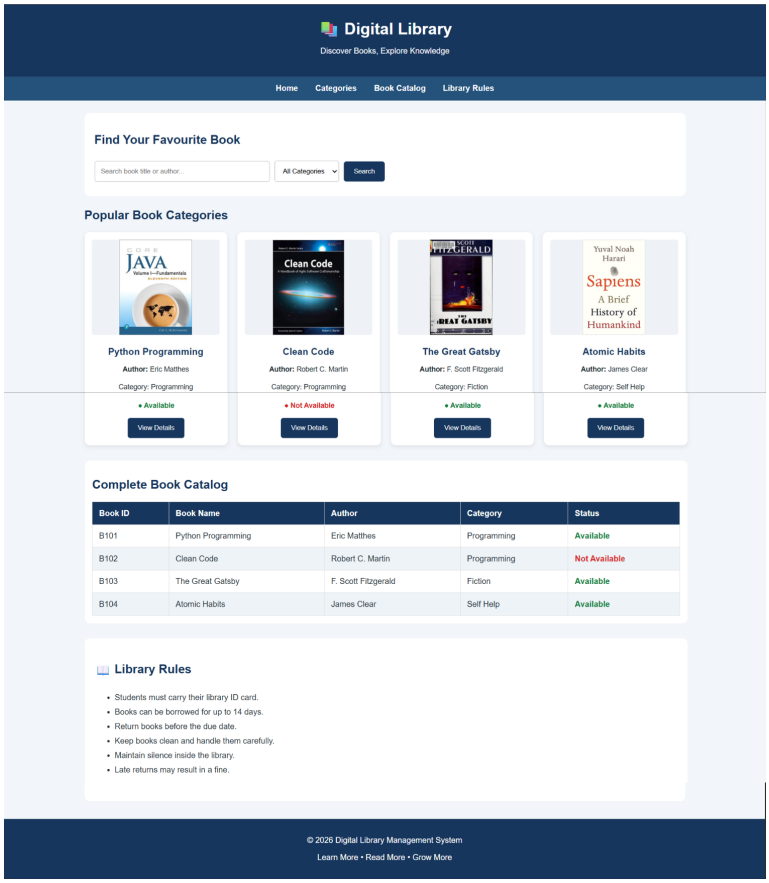

Case Study 2: Digital Library Website

Overview

The Digital Library website is designed to help users discover books, check availability and review basic library rules.

Visible Features

- Header and navigation for Home, Categories, Book Catalog and Library Rules.
- Book search field with a category selector and Search button.
- Popular book cards with cover images, author, category and availability status.
- Book catalog table containing book ID, title, author, category and status.
- Library rules section describing borrowing and handling expectations.

Output screenshot: Digital Library homepage, catalog and rules.

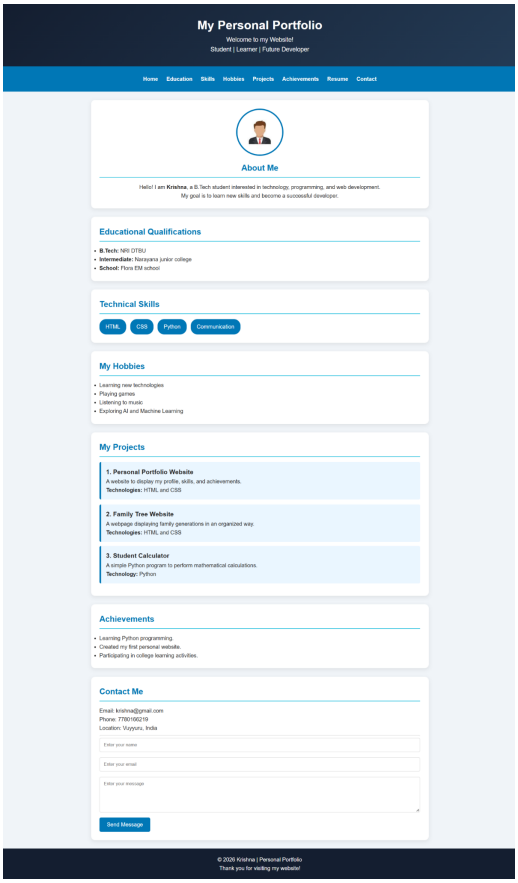

Case Study 3: Personal Portfolio Website

Overview

The Personal Portfolio website introduces a student profile and organizes education, skills, hobbies, projects, achievements and contact details into separate sections.

Visible Features

- Header with portfolio title and student introduction.
- Navigation links to the main portfolio sections.
- About Me and Educational Qualifications sections.
- Technical Skills displayed as labels or badges.
- Hobbies, project summaries and achievements.
- Contact details and a form with name, email and message fields.

Output screenshot: Personal Portfolio webpage.

5. Conclusion

The three screenshots demonstrate different types of website interfaces: an online shopping page, a digital library page and a personal portfolio. Each case study has a distinct purpose and organizes information through navigation, content sections and reusable visual components.

Declaration

I confirm that the case studies included in this report are the projects selected for my Web Development Activity-Based Learning assignment. I will maintain the corresponding source code and explain the work during evaluation.
